## INVESTMENT MANAGEMENT

**Since August 2018 Sompisi IT Solutions has partnered with SS&C Advent in providing solutions in the Investment Management space.**

Whatever your preference or needs, SS&C Advent Solutions and services are built around your business. They offer a highly - flexible combination of operational services and/or technology solutions tailored for your specific business requirements.

## SHAREPOINT CONSULTING

**Our practice is focused on professional services offering non-technical and technical advisory. We've learned that often the biggest challenge with unsuccessful SharePoint implementations are on the non- technical side. We assist our clients with the planning and project management of SharePoint implementation, training, support and adoption.**

We work on both on-premise SharePoint or SharePoint Online. Our preference is SharePoint online because we believe it will save your company a lot of money. We are also very comfortable and have vast experience with on-premise SharePoint. Our approach is to picture the desired outcome beforehand and work backwards. We then merge subject matter expertise with systems/information architecture principles in order to realize a solution design that uniquely fits its intended user. We develop robust SharePoint solutions, based on preference we use as much of the out-of-the-box functionality, but we have solid experience in SharePoint to fully customize solutions.

Dependent on size and criticality of your SharePoint environment, we can proficiently provide tailor- made Service Level Agreement (SLA) to ensure an efficient and effectively running environment 24X7.

## OFFICE 365 IMPLEMENTATION

**We believe South Africa is just on the verge of cloud adoption and our business is positioned very well to benefit from this business.**

Our speciality is cloud, we migrate our clients to Office 365 and help remove local company servers which only allows your employees to only logon and see their files when they are at work. What we offer is something that will give you a full infrastructure in the cloud without investing on those hardware on premise.

Finally, we believe this is a perfect solution to let you and your business focus on what you do best, your business while we take care of your IT Services. Sompisi has migrated a couple of clients to the cloud they loved the flexibility of working wherever there is a computer connected to the internet.

Talk to us and let's transform your business and save you money.

# WEALTH & ASSET MANAGEMENT

**As an investment manager you need to quickly and efficiently onboard new clients, obtain a holistic view of your clients' entire financial picture, provide comprehensive reports, track asset performance; and access market, corporate, and portfolio data.**

- A holistic view of your clients' wealth in a single platform
- Automated connections to custodial and market data providers
- Automated client onboarding
- Flexible tools for creating daily, consolidated reports
- Multi-currency and multi-asset class support

## OTHER FINANCIAL SERVICES SOLUTIONS

- Fund Order Management - Automate your fund operations
- Portfolio construction & rebalancing - Making the complex simple to accelerate growth
- Client portal - Enhance the client experience
- Investor reporting - Show your work effectively
- Management reporting - Business intelligence for better decision making
- Regulatory reporting - Satisfy regulators with complete control and transparency
- Data management - Data is everything
- Reconciliation - Reconciliation made easy
- Performance Management - Know where you stand
- Research Management - Capitalize on your knowledge
- Margin & finance management - Stay on top of your costs

## WHERE DO WE DO BUSINESS

**We are a South African based business. We do business anywhere in the country. Our experiences spans across 25 years of IT experience from IT Support to Solution development We implement pre-built solutions to help businesses to realize their ROI faster than most.**

We passionate about growing IT professionals in South Africa, every year we take interns and train them and place them in jobs or employ them internally:

- Business Analysts
- Project Managers
- Developers (Java, .Net, Mobile Apps, Web Developers, SharePoint Developers etc)
- IT Support (Desktop Support & Networking)

Whatever your IT need, if we don't already have it, we will source the right talent and manage them for you.

# WE ARE DRIVEN

**When you invest with us you invest in South African skills development.**
